

Silo - Bug # 1240: Enable VISIT_VERBOSE_MAKEFILE for Debug build types

Status:	Rejected	Priority:	Normal
Author:	Mark Miller	Category:	
Created:	11/14/2012	Assigned to:	
Updated:	01/17/2013	Due date:	
Likelihood:	3 - Occasional		
Severity:	2 - Minor Irritation		
Silo Found in Version:	4.8		
OS:	All		
Support Group:	Any		
Subject:	Enable VISIT_VERBOSE_MAKEFILE for Debug build types		
Description:	<p>If @VISIT_VERBOSE_MAKEFILE@ CMake variable is what I think it is (enables @make VERBOSE=1@ by default), then I think it should just be turned on whenever a Debug build type is requested.</p> <p>Since I saw this explicitly set in config-site/edge83.cmake and since I frequently do debug builds but don't get verbose makefiles by default, I concluded that it is currently <i>*not*</i> the case that we enable verbose make for debug builds.</p>		

History
