

VisIt - Bug # 1331: Add information to the download page to more explicitly state which versions have parallel support

Status:	Pending	Priority:	Normal
Author:	Eric Brugger	Category:	
Created:	02/06/2013	Assigned to:	Eric Brugger
Updated:	02/19/2013	Due date:	
Likelihood:	3 - Occasional		
Severity:	2 - Minor Irritation		
Found in Version:	2.6.0		
OS:	All		
Support Group:	Any		
Subject:	Add information to the download page to more explicitly state which versions have parallel support.		
Description:	Someone recently downloaded a pre-built linux version and then tried to use libsim in parallel with it and it failed because the pre-built version doesn't have parallel support. We should make that more explicit. The windows and Mac versions have parallel support. The windows version may require mpi to be installed, not 100% for sure.
