<b>Subject:</b>	add option to specify nodal/zone char variable for ghosting		
<b>Description:</b>	<p>cq-id: VisIt00007121 cq-submitter: Mark Miller cq-submit-date: 03/30/06</p> <p>It would be nice to be able to "generalize" ghosting of silo meshes by storing nodal/zonal ghost values in a mesh variable. This would involve adding an option to ucd, quad, point and multimeshes to specify the names of variables defined on those meshes as ghost variables.</p>
