<b>Subject:</b>	create a "tracing" driver for doing I/O performance assessement		
<b>Description:</b>	<p>cq-id: Vislt00007413 cq-submitter: Mark Miller cq-submit-date: 08/01/06</p> <p>We could add a driver to silo that doesn't do any I/O but does create tracing information including size of I/O requests and various other statistics.</p> <p>If the driver did no actual I/O, users could "enable" it to see difference in run time with I/O turned on and I/O turned off.</p>
