

Silo - Bug # 323: silex displays wrong data for topo_dim member

Status:	Pending	Priority:	Normal
Author:	Mark Miller	Category:	
Created:	08/04/2010	Assigned to:	
Updated:	08/04/2010	Due date:	
Likelihood:	3 - Occasional		
Severity:	2 - Minor Irritation		
Silo Found in Version:	4.7.2		
OS:	All		
Support Group:	DOE/ASC		
Subject:	silex displays wrong data for topo_dim member		
Description:	<p>cq-id: VisIt00009008 cq-submitter: Mark Miller cq-submit-date: 01/19/10</p> <p>Silex interacts with Silo data at the DBObject level, that is DBGetObject(). As such, it doesn't see the data in the same way a Silo client would via DBGet<Whatever> calls. In those cases where the lib changes data on write and then again on read, Silex winds up displaying wrong data. topo_dim is an example. It is always stored in the file such that its value is one greater than the actual value.</p>
