Subject:	add support for packed variables		
Description:	<p>cq-id: Vislt00009057 cq-submitter: Mark Miller cq-submit-date: 07/28/10</p> <p>Packed variables are DBPutxxxvar calls where 'nvars>1' but where there is only a single pointer for all data and it is stored all subvar vals for first node/zone followed by all subvar vals for 2nd node/zone, etc.</p> <p>Note, special attention will have to be paid to maintaining the names of the subvars and permitting a caller to obtain just some of them on a DBGetXXXvar call.</p>
