Support Group:	Any		
Subject:	Silo is compressing datasets that it shouldn't (matnos array)		
Description:	<p>Olivier Cessenat ran into this problem.</p> <p>Silo library appears to be trying to compress datasets it explicitly should NOT (at least it is designed that way). My first glance at the code is that it is NOT honoring the 'flags=0' when setting up compression in db_hdf5_set_compression.</p> <p>An attached c code demonstrates the problem.</p>
