Subject:	Design block-based VFD and draft RFC		
Description:	<p>Informed from Silo's block-based VFD that met with great success on Dawn, develop the equivalent, HDF5-built-in VFD for HDF5.</p> <p>Some of the things silo's block-based VFD does is to get around various <code>_bugs_</code> in the way upper layers of HDF5 were/are interacting with the VFD layer. The issues encountered there need to be discussed, tests demonstrating the issues on HDF5-1.8.4 need to be put together to demonstrate the problem(s).</p>
